

Risk Assessment Saas Fee

Hazard	Explanation	People at risk	Control Measures	Notes
Icy paths	Theres a long walk from the bus stop to the pistes	Everyone	Wear footwear with good grip. Take care.	
Altitude Sickness.	This begins around 2500m, and this resort rises to 3500m	Unacclimatised unfit young people	Progress upwards gradually. Leave higher runs until later in the week. Take rests at lower altitude.	
Crevasses	Most pistes are on active glaciers	Everyone	Keep to the marked pistes	
Serac Fall	Some pistes have seracs above them	Everyone	Keep to the marked pistes. Choose stopping areas with care.	
Avalanche		Everyone	Keep to marked pistes. Respect avalanche warnings. Be vigilant during & after snowfall or high winds	
T-Bars (Lots of them)	Bar catches and swings into waiting people	Everyone	Teach all to use them properly. ie Inside skier leaves last & holds bar if necessary. Clear exit area quickly. Avoid loose clothing & rucsacs that can catch.	
Chairlifts	Falling off lift	Irresponsible students	Take off rucsacs. Ensure everyone uses the safety bar properly.	
Lunch time play	Danger surrounds many restaurants	Irresponsible students	A designated adult to supervise at lunchtime & keep headcounting	Avoid Felskinn area as it is surrounded by cliffs
Losing Students	Student follows wrong turn	Students	Brief everyone where they are going. Stop by every junction & check. Teach students to navigate not just follow. Have a RV point if they get split up.	
Losing Students	Student falls off lift	Students	Fallen students to wait near lift . Instructor goes up last & can see where they are.	
Innappropriate terrain	Loss of control leading to high speed falls, collisions, and loss of confidence	Less skilled / confident skiers / boarders	Progress gradually. Check terrain before taking a group there. A suggested progression follows below
