

RISK ASSESSMENT FOR ST MORITZ

Hazard	Explanation	People at Risk	Control Measures
Cold	The top of Piz Nair is very exposed.	Everyone	Check pupils have appropriate equipment and clothing before departure; only use on a clear day with a good weather forecast.
Dehydration	Skiing up to 3000m.	Everyone	Take plenty of water and stop regularly for drinks.
T-bars on nursery slopes	Ensure T-bar usage is understood.	Beginners	Especially on 1 st few occasions, give clear instructions and recruit assistance of experienced skiers/boarders.
Avalanche danger	Off-piste areas may avalanche.	Everyone	Keep on piste in resort area; Always follow guidance of piste security.
Weather conditions	If closed in at village.	Everyone	Check conditions with lift station; webcam and internet checks also available at Centre reception.
Train	Breaks journey half-way at Chantarella.	Everyone	Close control of groups at train change and gather groups at top.
Large town	Traffic, crossing roads.	Everyone	Adults control walking across road (NB – right of zebra crossings not always observed!!)
Inappropriate terrain	Loss of control leading to high speed falls, collisions and loss of confidence.	Everyone	Progressions must be very gradual. Check terrain before taking a group there. A suggested progression follows....
